

**Mandatory Language for Monitoring and Reporting Violation
Failure to Submit a Disinfectant Level Quarterly Operating Report (DLQOR)
MONITORING, ROUTINE (DBP), MAJOR/CHLORINE**

CITY OF JEWETT PWS 1450007 has violated the monitoring and reporting requirements set by Texas Commission on Environmental Quality (TCEQ) in Title 30, Texas Administrative Code (30 TAC), Section 290, Subchapter F. Public water systems are required to properly disinfect water before distribution, maintain acceptable disinfection residuals within the distribution system, monitor the disinfectant residual at various locations throughout the distribution system, and report the results of that monitoring to the TCEQ on a quarterly basis.

Results of regular monitoring are an indicator of whether or not your drinking water is safe from microbial contamination.

Type of violation: **DLQOR**

This violation(s) occurred in the monitoring period(s) 4Q2022, 3Q2022, 1Q2021, 1Q2020, 3Q2019, 1Q2019, 4Q2018, 3Q2017

We are taking the following actions to address this issue: We have submitted our DLQOR on a quarterly basis to TCEQ during a correct compliance period and are no longer in violation as of 12/07/2023. All DLQOR's were finished and mailed to the TCEQ but did not arrive by the date that TCEQ requires. All DLQOR's are now done online. There is nothing wrong nor has there ever been anything wrong with the water within the City of Jewett.

Please share this information with all people who drink this water, especially those who may not have received this notice directly (i.e., people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

**Revised Total Coliform Rule (RTCR) Failure to Report Monitoring Events to
the State that are Not Related to *E. coli*-positive Sample Results –
Template 3-5**

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Reporting Requirement(s) Not Met for CITY OF JEWETT PWS 1450007

We are required to report the results of monitoring of your drinking water for specific contaminants on a regular basis by OCT 2022. Results of regular monitoring are an indicator of whether or not your drinking water meets health standards. In OCT 2020, we did not report the results of monitoring for total coliform.

Our system failed to notify the state drinking water program as required by OCT 2022. Although public health was not impacted, as our customers, you have a right to know what happened and what we did to correct the situation.

What should I do?

There is nothing you need to do at this time. You do not need to boil your water or take other actions.

What is being done? Our corrective action is: In order to return to compliance, our system had to collect a distribution sample within the correct compliance period and turn in the results to TCEQ which we did and returned to compliance as of 12/08/2022.
